Learning Objectives:

“Effect of Fludrocortisone Acetate on Chronic Unexplained Nausea and Abdominal Pain in Children With Orthostatic Intolerance”

1. Recognize the common symptoms suggestive of orthostatic intolerance (OI) in patients with chronic nausea or abdominal pain.
2. Know the definition of postural orthostatic tachycardia syndrome (POTS).
3. Understand the indications for testing for OI and treating GI patients with fludrocortisone.

Novel *Helicobacter pylori* Sequencing Test Identifies High Rate of Clarithromycin Resistance”

1. Know antibiotic treatment regimens for *H. pylori* gastritis - Learn when to perform clarithromycin resistance testing
2. Recognize methods of testing *H. pylori* for clarithromycin resistance:

Principal Faculty and Credentials

Faculty credentials and disclosures are listed in the Journal articles

Date of Release:

July 1, 2014

Date of Last Revision:

July 1, 2014

Date of Expiration:

July 1, 2015

Necessary Hardware and Software:

Adobe

Compatible Web Browser listed below:

- Internet Explorer version 6.0 or higher
- Mozilla Firefox 1.0 or higher
- Netscape Navigator 6.0 or higher
- Apple – Safari

Estimated Time to Complete this Activity:

It is estimated that it will take 1 hour to read the article and complete the post test.

Method of Physician Participation:

All participants read an article, take a post-test with a minimum of 100% passing score and complete an activity evaluation at the end of the activity before being able to print a certificate of completion.

Policy on Privacy and Confidentiality:

The personal information collected on this evaluation site is used only for our records and is not distributed to any individuals or companies.

Bibliographic Sources

References are provided in the Journal article.

Copyright:

All faculty in this activity have given their permission for publication.

Contact Information:

For questions on CME credit for this activity, contact Norm Skog at norm@AmedcoEmail.com or 651-261-4318.
